OBJECTIVE

I am seeking a position as a website developer that allows me to work remotely or is based within 50 miles of Asheville, NC or 25 miles of Fredericksburg, VA.

PROFILE

I am a back-end web developer with 5 years of professional experience. I believe in being honest, reliable, and hardworking with a focus on customer satisfaction. I pride myself on being able to meet deadlines independently and without supervision, though I enjoy being part of a team and collaborating with other professionals. I am a citizen of the United Kingdom and a permanent resident (green card) of the United States.

SKILLS

Technology and Programming

PHP, JavaScript/jQuery, AJAX, JSON/XML, HTML, CSS3, MySQL, HTML5, APIs, app development for iOS/ Android devices, Wordpress, Drupal, UNIX, web hosting management, website maintenance.

Strategy and Planning

Gather website requirements from clients; identify appropriate technology to support business goals; price out and plan time to completion of website; write proposals to submit to clients; site security; analytics.

EXPERIENCE

CTO / Lead Web Developer, Ayutopia International; Fairview, NC — 2013-present

As Chief Technology Officer, I manage the company's technology initiatives (such as internal project/ team management, ecommerce, digital marketing, etc.), based on current best practices and industry standards. I evaluate, identify, and implement appropriate technology platforms (such as MailChimp, Basecamp, WooCommerce, PaidMembershipsPro, Stealth Seminar, Teamviewer, etc.) for delivering the company's services, managing internal projects, and serving client needs. I collaborate with other senior level executives, employees, and independent contractors. I monitor website analytics and give recommendations to improve performance. I ensure that technology standards and best practices are maintained across the organization and that technical problems are resolved in a timely and cost-effective manner.

DAVID ROBB

As lead web developer, I build websites for both internal use and for clients. I am also in charge of managing the web hosting server.

I interact with customers by phone and email to gather website requirements, answer questions, and fix any problems. Most of the websites I have built at Ayutopia are Wordpress based with customized PHP, JavaScript, CSS and MySQL. I also provided clients with basic Wordpress training over Teamviewer or Skype.

I created and published Ayutopia's mobile app using HTML5 which is available in both the Apple app store and Google Play.

Web Developer, American Bankruptcy Institute; Alexandria ,VA — 2011-2013

I worked on a number of websites for use by members of the American Bankruptcy Institute who include lawyers, judges, and the public looking for bankruptcy information. The majority of the websites I worked on were Drupal 6 and 7 based.

I was lead developer on one of ABI's highest traffic websites (news.abi.org) which received thousands of unique visitors a day.

Web Developer Intern, TMG Custom Media; Washington D.C. — 2011 (4 months)

Note: TMG has merged with other companies and is currently known as Manifest.

I worked on a number of client websites, the majority of which were Drupal 5 and 6 based. I made front end changes to websites using CSS and provided graphics. I evaluated tools and plugins when given a problem to solve.

Web Developer, Freelance; Edinburgh, Scotland, UK — 2010

I built several websites using PHP, MySQL, CSS, JavaScript, and HTML.

EDUCATION

Edinburgh Napier University; Scotland, UK

Bachelors of Science with Honors in Software Technology, 2009
